

Temporary Fibreline Operating Technician

Mercer Peace River Pulp Ltd. is an integral part of the Canadian forest products industry, providing the North-West, Alberta region with approximately 300 jobs while sustainably managing the forests. A career at Mercer Peace River offers an opportunity for growth, meaningful work, and a collaborative learning environment. Throughout your career, you will be supported by a team of highly skilled professionals and provided the self-motivating environment needed to make your goals achievable.

We are seeking a full-time, temporary Operating Technician within the Fibreline Department. Fibreline Operating Technicians are instrumental in our pulp-making process and have the responsibility to ensure their specific area and processes function in accordance with department standards and expectations. The term of this position will extend until December 31, 2022, with the possibility of extension.

Role and Responsibilities

- Operate and monitor multi-function process control equipment within their respective departments
- Adhere to department training plan working towards achieving competency in all operational areas and associated control room operating functions
- Understand and able to proficiently demonstrate all relevant tasks and procedures within their respective department
- Support team in training and mentoring of new technicians
- Understand the key result areas (KRA's) with regards to safety, cost, people, environment, quality and production and how they affect the key performance indicators (KPI's), applying these business principals to operations and the decision-making process.
- Assist in troubleshooting all areas of concern within their respective department while supporting a rigorous approach to root cause failure analysis and follow-up for improvement
- Support lead operator in providing timely and effective input on IIR initiation
- Abide by all standards, government regulations, and company policies and procedures related to safe operations
- Support scheduled/unscheduled overtime requirements within the department average
- Maintain detailed daily shift logbook entries and thorough shift relief
- Maintain a safe work environment, responding to concerns in a responsive, professional manner
- Additional duties as required.

Qualifications and Experience

- High school diploma or equivalent
- Strong team player, interpersonal and communication skills
- Self-driven, innovative, and safety-conscious individual
- Strong organizational and decision-making skills with excellent problem solving, troubleshooting, and analytical abilities
- Proven ability to work with diverse groups and understanding of regulations and workforce legalities
- Enjoy working with tools, equipment, instruments, and machinery
- Willingness to obtain Pulp and Paper Certification, as well as 4th Class Power Engineering Certificate
- 4th Class Power Engineering Certificate or post-secondary education in a Chemical field would be considered an asset
